Dear Sir:

Pursuant to the requirements of 37 C.F.R. § 1.56, submitted herewith on the accompanying Supplemental Information Disclosure Statement List is a listing of documents known to Applicants or Applicants' attorneys. In accordance with 37 C.F.R. § 1.98(a)(2), a copy of any cited U.S. patent or U.S. patent application publication documents is not enclosed. But, pursuant to 37 C.F.R. § 1.98(a)(2)(iv), and for the Examiner's review, Applicants have enclosed a copy of any cited: (1) non-U.S. patent or patent application, (2) non-patent publication, and (3) document from the prosecution of a U.S. or non-U.S. patent application.

Regarding category (3), documents from the prosecution of related U.S. and non-U.S. patent applications, Applicants note that 37 C.F.R. § 1.98(b) does not mention, and thus does not require, that Applicants provide any particular set of identifying information. While 37 C.F.R. § 1.98(a)(1) requires Applicants to provide a list of such documents, it does not require Applicants to include in that list specific identifying information. 37 C.F.R. § 1.98(a)(2)(iv) further requires Applicants to provide a copy of such documents. Thus, the rules do not require that Applicants provide any particular set of information about the documents in category (3) prior to the Examiner's consideration of all the cited information. Nevertheless, in order to be as helpful as possible, Applicants have provided (a) information regarding the source of each document, which is the prosecution record of a U.S. or a non-U.S. patent application, and (b) a title or description of each document.

The information provided mirrors the requirements for cited U.S. and non-U.S. patent applications as set forth by 37 C.F.R. § 1.98(b). For at least these reasons, Applicants respectfully request consideration of all documents submitted in this Supplemental Information Disclosure Statement and List.

Applicants would like to bring to the attention of the Examiner the existence of the following U.S. patent applications, which either have been published or issued as U.S. patents:
